About Me

Game Designer with experience in **Unity C#** and **Godot GDScript**. I have worked across professional, indie and personal projects focusing on **game feel** and **player controls**, tied together by a strong **narrative** bringing everything together. I iterate quickly through **paper prototyping** and code, documenting my process on **Miro**. Co-organizer of 3 Street Jam game jams and winner of the Franco-Belge GameJam 2025.

Experience

Game Designer/ Programming Intern Feb 2026-Jul 2026

Duckosaurus Games *Ghent, BE*

- Technical Designer on *Dino Duck Mayhem*, an early-access survivors-like game, in a team of 4 developers.
- Analyzed streamer playthroughs of the early-access build to evaluate player engagement, then pitched 13 design changes documented in Miro; **5 were shipped**. Increasing engagement by **45%**
- Implemented features and characters in **Godot** using **C#** and **GDScript**.
- Led **narrative design**: wrote the main story and 2 fully fleshed-out characters, with character sheets and narrative pacing documents in Word and Miro.

Game Designer/ Programmer Jan 2025 - Sept 2025

Group Projects - Sombre @ Howest *Kortrijk, BE*

- Level designer and programmer in a team of 6 on *Sombre*, built in **Unity** and **C#**; designed and prototyped core mechanics and levels.
- Built 3 shadow types using Unity **ScriptableObjects**, extending the team's core shadow mechanic (recognized by instructors as unique and technically demanding); 2 shipped in the final game.

Projects

Shoppers Havoc | *Unity C#, Level Design, Rapid Prototyping* 2025

- Designed and prototyped a third-person 3D comedy game in one week, built around a player-cloning mechanic used to collect items and outmaneuver rivals.
- Designed 4 rival shopper archetypes with distinct behaviours (stealing, sabotage, nuisance), creating strategic decisions around clone placement and positioning.

Bud's Oasis - Won @ Franco Belge 2025 | *Unity, Blender 3D art* 2025

- Designed a local co-op survivors-like (bullet heaven) in Unity C# in a 48-hour game jam; won the **Community Award** at Franco-Belge GameJam 2025.
- Designed core gameplay loop and balancing difficulty for co-op through rapid playtests and iteration.
- Modeled and optimized 3D assets in Blender and integrated them into Unity, keeping a consistent art style.

Street Jam | *Co-organizer, 3 editions* 2024 - 2026

- Co-organized three annual game jams: handled promotion, coordinated organizing team, and ran event logistics.

Education

Howest - Digital Arts and Entertainment Kortrijk, Be

Bachelors in Technical Arts *Sept 2022 – Sept 2026*

- Studied the full game production pipeline from concepting, prototyping and release, with coursework in game design, programming (C#), production and business management.
- Shipped 2 team games across Group Projects and Applied Games.

Skills

Technical: C#, C++, BluePrints, Git, GDScript,
Softwares: Unity, Godot, Miro, Hack and Plan, Substance Painter, Blender, Photoshop.
